

INFUSIO
BY PHILIP BATTIADE

PHILIP BATTIADE

“Research is a science;
Medicine an art.”

Philip Battiade

Philip Battiade is a British-born, Naturopath with over 20 years of international medical practice. Specializing in rehabilitative medicine, biological cancer therapies, and the treatment of chronic syndromes, **Philip has established himself as a foremost expert on holistic and integrative medicine.** He has also gained widespread recognition as the founder and developer of the Infusio Treatment Concept.

Philip spent almost 2 decades as a medical consultant and practitioner, developing an international network of some of the world’s leading specialists such as Dr. Vineet Gupta, Dr. Jaco van der Walt, Dr. Leigh Erin Connealy, and Prof. Dr. Thomas Vogl. His extensive travel enabled him to experience the challenges and benefits of health care around the globe. Philip’s worldwide resources help provide reliable solutions to patients seeking medical alternatives and treatment outside of their home countries.

As an international medical consultant, educator, researcher, and expert spokesperson for integrative health, Philip felt the need to redefine the patient experience and make personalized, integrative medicine understandable, approachable and available. In 2011 he realized his vision and founded the first Infusio Treatment Center in Frankfurt, Germany, quickly expanding to multiple centers and consulting offices around the world. Infusio now has offices in Germany; Malaysia; India; China, Miami, San Francisco and Beverly Hills U.S.A.

HARMONY. BALANCE. RESTORATION.

THE INFUSIO CONCEPT AT WORK

The Infusio Concept is a comprehensive and multi-faceted approach to holistic healthcare and healing. Designed by renowned British naturopath and integrative medicine expert Philip Battiade, The Infusio Concept is the product of over 20 years of experience and painstaking research into how to combine the best of alternative medicine with the cutting edge of modern scientific medicine into a safe and effective treatment method.

REBUILDING THE IMMUNE SYSTEM BY TARGETING THE ROOT CAUSE OF DISEASE

The human immune system is one of nature's most sophisticated, complex designs. Like a well built and elaborate engine, the immune system's performance - and thus a person's overall health - will depend to a large degree on what goes into the body, the stresses the body has to cope with and how well it is maintained.

Many factors play a role in determining a person's health as well as in the development and progression of illnesses. Some of these are beyond an individual's control. For this reason, The Infusio Concept works to offer patients a set of tools to keep the engine of their own unique immune systems running and to optimize its function.

WHAT IS THE INFUSIO CONCEPT?

The Infusio Concept was designed on the principle of "innovation through integration." The framework of The Infusio Concept consists of the 5 Steps To Health, a foundational system to help determine the blueprint of each patient's health and lifestyle profile and then to optimize their health.

WHAT ARE THE 5 STEPS TO HEALTH?

- Immune Modulation
- Substitution
- Detoxification
- Disease Specific Treatment
- Mind-Body Medicine

Taking stock of how each patient's internal engine is running is the first step towards designing the appropriate treatment plan. The Five Steps To Health breaks the process down into the essential components of a restorative approach to healing.

WHAT DOES THE INFUSIO CONCEPT TREAT?

The Infusio Concept can be used to treat any disease or simply to gain and retain optimal health. Understanding the relationship between the mind, the body, and its environment is important for both healthy individuals and those suffering from illness alike. Specifically, The Infusio Concept focuses on providing solutions for individuals suffering from chronic, degenerative conditions such as:

- Cancer
- Autoimmune disorders
- Neurological disorders
- Lyme Disease
- Crohn's Disease
- Fibromyalgia
- Hepatitis
- Obesity
- Addiction
- Male and female health

WHAT ARE SOME OF THE BENEFITS OF THE INFUSIO CONCEPT?

- Non-toxic substances
- Minimal side effects
- Integrative approach
- European medicine
- Minimally invasive

LEARN MORE ABOUT THE WIDE RANGE OF SERVICES AVAILABLE THROUGH THE INFUSIO CONCEPT

From Bioenergetics to Stem Cell Therapy and rejuvenating spa treatments, Infusio Treatment Centers offer a medical and wellness experience all in one.

Infusio is a unique and innovative approach to healing. It combines the best of modern and alternative, patient-centered medicine with an optimal, relaxed healing spa-like environment, while The Five Steps To Health provide a superlative model of health care in a rapidly changing society.

"The Five-Step integrative approach of Infusio is designed to overcome any health disorder. In my opinion, these components form the core pillars of any successful therapy." - Philip Battiade: Five Steps To Health

INTRODUCING THE
FIVE STEPS
TO HEALTH

“Treat the patient,
not the disease.”

The Infusio Concept has created a framework of five steps to take a patient's entire health profile into account in order to come up with a personalized road map for treatment. While millions of patients can suffer from cancer or rheumatoid arthritis at any given time, no two bodies are alike, and a “one size fits all” treatment philosophy can miss underlying elements that are unique to each patient's case.

The Infusio Concept's Five Steps To Health strives to shed light on the key areas that can make a difference in a person's general well being in times of health, as well as target areas for modification and treatment in times of illness.

STEP ONE: IMMUNE MODULATION

If the immune system is the engine that keeps the body running at peak condition, any flaw or ailment will throw the entire system off balance, and impact a patient's ability to maintain their health and fight off infection and disease. The Immune Modulation step looks to restore healthy ratios of immune cells to allow the immune system to function in a coordinated and effective manner.

STEP TWO: SUBSTITUTION

Poor diet, stress, and lifestyle can lead to a low level of essential nutrients and minerals. Digestive problems can also compound the problem of bad absorption. While the body can be an incredibly resilient machine, for patients battling serious illnesses like cancer, taking in essential nutrients and vitamins in a high enough concentration can be critical. Substitution offers patients a high dose of intravenous vitamins, minerals, and amino acids, bypassing the digestive tract for an immediate immune and metabolic boost.

STEP THREE: DETOXIFICATION

Toxins in some form or another are unavoidable. Environmental and industrial pollutants and chemicals have become a normal part of every day life and can be found in everything from our food to our clothes. Also, poor liver function may result in a buildup of substances in our blood stream, having a detrimental effect on our health. Purging the body of as many toxic elements as possible and restoring healthy self-detoxification is a very important step in getting and staying as healthy as possible.

STEP FOUR: DISEASE-SPECIFIC THERAPY

Integrative medicine strives to take a critical and organic approach to diagnosis and treatment of disease, where the best methods of both classic and alternative medicine practices work in concert with each other to find a viable treatment plan for each case. Always as non-toxic and as non-invasive as possible.

STEP FIVE: MIND-BODY MEDICINE

This step helps patients to identify potential areas for lifestyle improvements to change habits and patterns, which may be part of the root cause of their illness. Issues like chronic stress and anxiety have been shown to weaken the immune response and cause inflammation that can exacerbate certain illnesses. Stress can also lead to other negative lifestyle habits as coping mechanisms, such as poor diet, depression, social isolation, and a sedentary lifestyle. The Infusio Concept recognizes the mind-body connection as an important factor in a patient's treatment plan, and can offer positive and healthy alternatives that patients can use to deal with this area.

THE INFUSIO CONCEPT MEDICAL

The comprehensive approach at Infusio Medical combines the latest cutting edge medical treatments and technology with integrative medical practices to offer patients a broader scope of options.

THE TOOLS

Integrative Approach - Combining the best of what traditional and integrative medicine have to offer.

Bioenergetics - Bioenergetics play a key role in our diagnostic and treatment protocols. Disturbances in the way the body processes energy often give important clues to the root cause of symptoms. Cutting edge science has developed a range of devices that we utilize to monitor and treat the body's energetic pathways.

Biological Dentistry - Root canals, gum disease, bone infections, and inflammation can often lead to broader health problems. Biological dentistry looks at the impact of oral ailments on overall health, pain syndromes and cancer.

THE INFUSIO CONCEPT PREVENTION

The Infusio Concept adheres to the old adage that “an ounce of prevention is worth a pound of cure.” Taking steps to preserve health before illness has a chance to take root can pay off huge dividends over a person's lifetime. The Infusio Concept offers a range of options for preserving health and preventing illness wherever possible. It also offers lifestyle enhancing and wellness options that contribute to the emotional and mental wellbeing; critical factors often overlooked, which play a vital role in overall health.

Integrative Dental Screening and Safe Amalgam Removal

Nutritional Screening

Bioenergetic Screening

Integrative Cancer Screening - biological markers, imaging, live blood analysis, bioenergetics, and other modern screening methods to identify signs of cancer.

Whole Body and Breast Thermography

Executive Physical - This screening program offers a comprehensive physical health screening. Extensive laboratory screening coupled with bioenergetics, physical examination, imaging and extensive consultation help to identify health issues before they develop. This program is targeted at business executives and others who need a fast track comprehensive check-up.

THE INFUSIO CONCEPT REJUVENATION

Whether the body is in a state of optimal health or fighting off an illness, making time for a little self care and rejuvenation is often dismissed as self indulgent or unnecessary in our frenetic modern world. The Infusio Concept works to educate patients at every end of the health spectrum on the necessity of making the effort to take care of the body so that it can in turn take better care of you.

Some of the many rejuvenation methods available through The Infusio Concept include:

- Intravenous Infusions of essential vitamins, minerals, and amino acids
- Detoxification
- Mind-Body Medicine
- U-Bodywork
- Cell Therapies

Infusio Elite is a Private Membership Association and the information contained on this website/brochure/leaflet is for the use of our Private Members Only. Please contact us for information regarding membership to Infusio Elite Private Association. *Some of the mentioned treatment modalities are exclusively available to Infusio Elite Members.

Phillip is incredible at what he does, educating me, not only on the chemical composition of my body, but also how the wrong mix of chemicals can result in unhealthy patterns of behavior or unconscious cycles. After every session I feel a greater connection to myself and an overall sense of deep inner bliss. Phillip emanates a powerful gentleness that enables a safe, nurturing space to receive the full effects of this powerful healing process. I cannot recommend Phillip and Infusio enough.

- Kain O.

It's been a joy watch my husband go through this treatment and to be able to see measurable outcomes... I have watched other patients who, without exception, are feeling better than when they arrived. I'm very grateful for the team, it is like being in a family.

- Kathy E.

We felt very well taken care of in all aspects. It has been a beautiful journey. We have experienced individualized attention, the staff is very much concerned about the patients which shows that they have a compassion for what they do. Your staff helps you to make your clinic a success - from the driver to the nurser there is great teamwork.

- Edward Z.

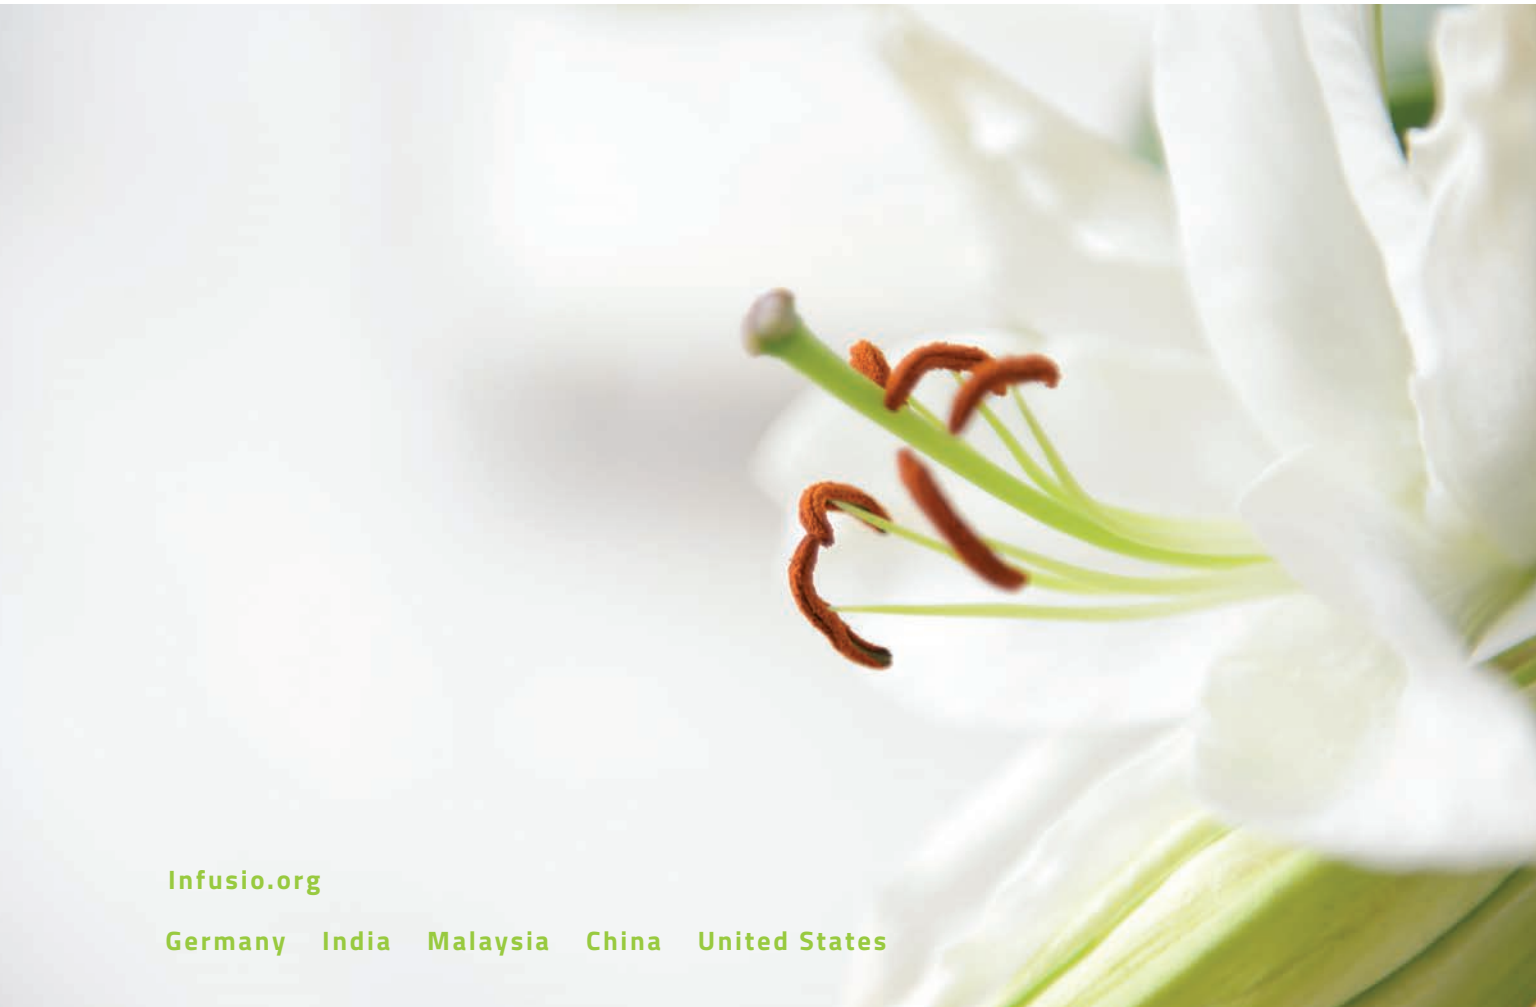

Phil has been given a rare gift to bring restoration to the human body. His dedication to this science will be a blessing to countless people who suffer. His paradigm is truly unique and different from any other health care provider that I know. His goal is to effect true healing, not merely to patch ailing body systems.

- Melissa A.

I think Philip's simplistic approach and his surety is key. The Infusio model is clean, effective, and has something for everyone. Coming from a patient's perspective, the environment of the clinic's spa-like setting, the energy, and the people are what sets this apart from others.

- Claire
